

Policy sickness

The state of our health system is diabolical and deteriorating by the day, and we are just at the start of winter.

Why are so many people requiring health care? Not surprisingly, they have become sick from the diabolical policies the State Labor Government are pushing through — their pet projects, such as the racing track and sports teams that we do not need, being paid for with taxpayers' money. Then to add even more to their misery the recent arrogant Federal Government has presented a Budget full of broken promises without proper scrutiny.
