

## Safety should be priority

Perth is on the Swan River so has a lot of bridges. We trust our Government maintains these bridges to a safe standard for us and our families.

Unfortunately, this Government has not maintained the Narrows Bridge for many years (*News*, 3/1), so has broken our trust.

How many others are not being maintained, especially the older ones?

The priority should be the safety and wellbeing of West Australians, not unwanted pet projects like a racetrack, a second-rate rugby team and ferry terminals in the wrong place.

Will it take a disaster and lives lost to do something? The \$217 million earmarked for the racetrack would go a long way to looking after our safety.

Shame Labor!
