

More tar and cement

The destruction of Burswood Park is breaking my heart. The video I just watched on Facebook showed about 20 trucks and earthmoving vehicles working today in an extreme fuel crisis and without even having the appropriate development approvals in place for a racetrack that very few want.

All the trees and grass are gone to be replaced by tarmac and concrete. A Government that promises to increase the urban tree canopy is tearing down mature trees instead. Throw out the WA Labor Government. They are a disgrace to this great State of ours.
