

Better spot for expos

So the usual delays with developments by this State Government could mean we may miss out to Brisbane on the 2029 LNG conference (*News*, 9/8).

It is a very complicated redevelopment site and delays are inevitable.

I believe the Perth Convention and Exhibition Centre is not in the best location anyway, being squeezed between the CBD and the river.

I suggest looking at alternatives and the most obvious location is where the Government wants to locate the Burswood racetrack that nobody wants.

It would kill two birds with one stone!

A long-term plan could then be put in place to incorporate the convention site with the existing foreshore developments which are squeezed into the adjacent area and if enlarged would be a long-term attraction for all tourists.
