

WACA can do all this

Last night the East Perth Community Group had a tour of the WACA Ground redevelopment, still under construction.

This location will have everything and more than the proposed Burswood Park facilities, except of course, the racetrack. We obviously don't need a racetrack since we have several in the Perth area and one planned for Keysbrook.

The WACA Ground will be able to host outdoor concerts and will have great cafes and catering facilities as well two pools and gyms, etc. So this is further argument against the madness of squandering \$217million of taxpayers' money on this proposed Burswood Park project.
